FOREWORD

The population figures shown in this report are based on Manitoba Health Services Commission records for 1986. The data are presented according to regional boundaries for the Manitoba Health.

Data for the regions include population of Cities, Towns, Villages, Rural Municipalities, Local Government Districts and Unorganized Territories. It should be noted that villages and towns are separately identified only if they are incorporated. If unincorporated, their population counts are included in the Rural Municipality in which they are located.

Population for small areas, say a rural town, can be biased because the mailing address may be reported as the place of residence. Any individual residing outside the town but having his mailing address in the town may, therefore, be counted as living within the town. This bias in the population figures would be reduced as the catchment area is increased. Thus, regional estimates would not be significantly affected by the misclassification bias.

ABBREVIATIONS AND DEFINITIONS OF TERMS

C: City
T: Town
V: Village
LGD: Local Government Distict - a designated area having no local government; administered by the province through a resident administrator.
U.T.: Unorganized Territory - areas of the province with no local government or resident administrator.
